# TIMBER WOLF

**THE TIMBER WOLF**—A gigantic roller coaster headlines Kansas City's Worlds of Fun's seventeenth season. The new coaster features 4,230 feet of wooden track over an expanded 7 acres in the Americana section. Twelve hundred concrete piers, 15 tons of nails, 30,000 bolts and 680,000 board feet of lumber were required to make the Timber Wolf come alive. During the 2 1/2 minute journey riders plummet 100 feet toward the earth, race around high-banking curves and crisscross through the wooden structure, while cresting hills and valleys at speeds up to 53 mph and +2.85 G-Force. Timber Wolf was unleashed April 1st 1989.
